Thanks Raji. I am assuming that since Lam is staying over from his previous meeting, he would prefer a morning time. How would 10 AM work for you all? Is that too late?

Also just to clarify, as you will see when you open the attachment to my original e-mail (you may have already opened it), it is just the process flowchart for developing that scope of work – that is what I was asked to put together at the Feb. 26 meeting that you were unable to attend.

Thanks again.

Eric

I was able to get my appointment moved so I am also available anytime on Friday the 5th.

I will look at the draft RI/FS Scope of Work and get back to you. Also just so

you know we already have a draft Statement of Work prepared which you will be receiving as an attachment to the AOC. This draft Statement of Work provides an overview of work that will be carried out as you implement the RI/FS.

I'm available for the 5th, any time.

Raji, I'll reserve the 8th floor conference room for the entire day, just in case.

Thanks.
Adam

Subject: US Oil Recovery Site Initial RI/FS Scope of Work Development Meeting

Hi Raji, Adam and Lam –

To follow-up on my previous conversations with each of you, I wanted to see if April 5, 2013 was still a good date for an initial meeting to discuss development of a scope of work to be attached to an Agreed Order for the RI/FS for the US Oil Recovery Site. If that date is still good for you, could you please confirm and let me know what time would be convenient? If that date is no longer available for you, could you please suggest a couple of alternatives? As we discussed, this meeting would be at EPA's offices in Dallas.

Also as I previously mentioned, in the EPA/PRP Group meeting on February 26, 2013 I was tasked with putting together a draft flow chart illustrating a possible process for developing the RI/FS scope of work for attachment to the Agreed Order. A first cut at such a flow chart is attached. Could you please give it look and provide your input? Our intent was not to provide anything rigorous or prescriptive, but rather just come up with a simple illustration of a possible process by which we all might work together to develop the RI/FS scope of work. As such, any and all input is appreciated. Please feel free to call, provide mark-ups via e-mail, or comment however you would prefer. We can also talk about this in our meeting.

Thanks again for your help on this project. We look forward to meeting with you on April 5 (or an alternative date if April 5 is no longer good).
